

## Traffic Tested® Genetics

America's Alfalfa offers durable, Traffic Tested® varieties that outperform and out-yield over the life of your alfalfa stand. The AmeriStand varieties are named for their ability to withstand traffic from grazing, equipment and even manure applications.

Selected for their yield and quality characteristics over the past 47 years, America's Alfalfa varieties produce tough, agronomically-sound, winter-hardy and disease resistant alfalfa in your fields. Look for the AmeriStand variety that is as rugged as you need on your farm.

Whether it is Traffic Tested® AmeriStand 403T, the high quality AmeriStand 407TQ or nematode and traffic resistant AmeriStand 444NT, **America's Alfalfa is the brand as rugged as you.**

Traffic Tested®

## AmeriStand 403T — Only University Proven Traffic Tested® Yield Leader

- Proven high yielding variety bred to with stand heavy traffic
- Very winterhardy (WH = 2.1) for long stand life, even in 4-cut schedules
- Superior disease resistance index (DRI) of 34/35; resists Race 2 *Aphanomyces*
- Delivers excellent fiber digestibility values in RFQ testing

## Arriba II — The Aphid Fighter

- High resistance to all major aphids
- Exceptionally leafy, very high TDN production
- High resistance to *Phytophthora* Root Rot
- Uniquely high resistance to crown rot complexes
- High resistance to Southern Root Knot and Stem Nematodes

## Archer III — Nematodes, No Problem

- Resists 4 types of nematodes
- Protects against white flagging
- Top performer in University yield trials
- Excellent yield and quality balance
- Resists both Blue and Spotted Alfalfa Aphids

## AmeriStand 444NT — Defies Nematodes and Wheel Traffic

- Best available nematode and traffic tolerance in a 4-dormancy alfalfa. Outperforms conventional varieties in yield and pounds of milk produced per acre. Resistance to four types of nematodes.
- Traffic Tested® genetics now patented for alfalfa systems
  - Best yield under wheel traffic
  - Best nematode protection in this dormancy class
  - 4.3 fall dormancy rating
  - Very dark green color, exceptional quality

## AmeriStand 407TQ — High Quality, Traffic Tested®

- Very high-yielding elite variety for the grower demanding top tonnage
- Very winterhardy (WH = 1.7) for long stand life, even in 3, 4 or 5-cut schedules
- Superior disease resistance index (DRI) of 34/35; resists Race 2 *Aphanomyces*
- Selected for superior forage quality through the combined use of *in vitro* and NIR
- Fast recovery (FD = 4.4) makes this an ideal variety for intensive management

## Variety Characteristics

Variety	Fall Dormancy	Traffic Tested	Phytophthora Root Rot	Anthraxnose	Verticillium Wilt	Fusarium Wilt	Bacterial Wilt	Stem Nematode	Northern Root Knot Nematode	Southern Root Knot Nematode	Columbia Root Knot Nematode	Lesion Nematode	Blue Alfalfa Aphid	Pea Aphid	Spotted Alfalfa Aphid
AmeriStand 403T	4	Yes	HR	HR	HR	HR	HR	MR							R
Arriba II	6	No	HR	HR	R	HR	R	HR	MR	HR	LR	LR	HR	HR	HR
Archer III	5	No	HR	HR	HR	HR	R	R	R	MR	HR	R	HR	MR	R
AmeriStand 444NT	4	Yes	HR	HR	MR	HR	HR	HR	R	HR	HR	R	MR	R	R
AmeriStand 407TQ	4.4	Yes	HR	HR	HR	HR	HR	R							R

HR = High Resistance  
DRI Stands For — HR = 5

R = Resistance
