

# Alfagraze 600 RR

FALL DORMANCY: 6

CUTTINGS/SEASON: 5+

## PERFORMANCE PROFILE

Traffic Tested®: Excellent

Yield Potential: Excellent

Stand Persistence: Excellent

Recovery After Cutting: V. Fast

## RESISTANCE RATINGS

Phytophthora Root Rot: R

Anthracoze: R

Verticillium Wilt: R

Fusarium Wilt: HR

Spotted Alfalfa Aphid: R

Stem Nematode: MR

Root Rot Nematode: HR

Southern Root Knot Nematode: HR

HR = >51% Resistance

R = 31-50% Resistance

MR = 15-30% Resistance

LR = 6-14% Resistance

## Original dual-purpose Alfagraze with Roundup® Ready Tolerance

- High yield potential, traffic tolerance and persistence
- Extra leafy plants have large, deep crowns for excellent grazing and fast recovery
- High resistance to nematodes and *Fusarium Wilt*
- Semi-dormant dual-purpose variety for haying or grazing
- Developed by Dr. Joe Bouton, Professor Emeritus, University of Georgia

• Primary Adaptation

## QUALITY DUAL PURPOSE FOR HAYING OR GRAZING

Alfagraze 600 RR combines improved yield potential with a good disease resistance package for long stand life. This semi-dormant variety features tolerance to Roundup® herbicide for superior weed control.

## SELECTED FOR SURVIVAL AND PERSISTENCE

Selected for grazing tolerance under severe pressure, the surviving parent plants had the best root and crown health. The exposure to grazing animal traffic for three years helped create large, deep crowns. It also improved root and crown carbohydrate reserves for regrowth and winter survival.

Traffic Tested® varieties are bred and selected for improved plant types with:

- Large deep-seated crowns
- Heavy plant weight
- Fine stems
- Large roots to store energy
- Abundant leaf mass

Traffic Tested®

Conventional

Due to the unique cropping practices do not plant Roundup Ready® Alfalfa in Imperial County, California, pending import approvals and until Forage Genetics International, LLC (FGI) grants express permission for such planting.

Forage Genetics International, LLC ("FGI") is a member of Excellence Through Stewardship® (ETS). FGI products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with FGI's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. As of June 2017, Roundup Ready® Alfalfa has pending import approvals. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Growers should refer to <http://www.biotradestatus.com/> for any updated information on import country approvals. Excellence Through Stewardship® is a registered trademark of Biotechnology Industry Organization.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready® crops contain genes that confer tolerance to glyphosate. Glyphosate herbicides will kill crops that are not tolerant to glyphosate.

Roundup Ready® is registered trademarks of Monsanto Technology LLC, used under license by Forage Genetics International, LLC. America's Alfalfa®, Traffic Tested® and HarvXtra® are registered trademarks of Forage Genetics International, LLC. HarvXtra® Alfalfa with Roundup Ready® Technology is enabled with Technology from The Samuel Roberts Noble Foundation, Inc. © 2017 Forage Genetics International, LLC

Due to factors outside of Forage Genetics International's (FGI's) control, such as weather, crop production patterns, and other factors, results to be obtained, including but not limited to yields or financial performance, cannot be predicted or guaranteed by FGI. Results are based upon FGI controlled tests and field trials and public trials. Actual results may vary.
